medifa supports reconstruction in Syria

medifa supports health care in Syria and donates mobile operating tables including gynaecological accessories to university hospitals in Damascus.

In close cooperation with the Syrian partner company Film Trading Company and Dr. med. Maysoon Iraki, a doctor living in Switzerland with Syrian roots, the medifa group delivered and installed two mobile operating tables to the university clinics "Al-Zahrawi" and "Mashfa Altawleed Aljamii" in Damascus. Both hospitals are specialist clinics for gynaecology and obstetrics.

Dr. Iraki volunteers as a medical specialist for gynaecology and obstetrics in Syria. She was very pleased with the support and is now hoping for further help from medical technology companies to successively improve health care in Syria.

"We are very pleased to have been able to contribute to the stabilisation of medical care in Damascus and would like to thank our Syrian partner Film Trading and Dr. Iraki, who played a decisive role in the implementation of this project," explains Dr. Wolfgang Hohnhaus, Managing Director of medifa healthcare group GmbH.

A manual operating table of the medifa 5000 series and an electrohydraulic operating table of the medifa 6000 series with corresponding gynaecological accessories have been supplied to Syria.
